

NEOVAULT

A Complete Testing Solution

Simplify, Organise and manage your Testing needs.

myNEO™

A Rapid Health Test Kit Enterprise Resource Planning (ERP) Platform and End User App.

A complete health testing solution for the: Sports, Travel, Education, Mining, Construction, Human Resource, Oil & Gas, Private & Government industry sectors.

What is NEOVAULT?

NEOVAULT is an Enterprise Resource Planning technology platform developed by Neopharma Technologies providing an accurate, safe and secure way to manage testing programs such as Covid-19 and or and other health tests.

NEOVAULT's software is very simple to use, yet powerful in its results. It allows for the creation of a seamless environment for testing with rapid test kits, with the ability to customise all aspects of your testing program.

What is MYNEO?

myNEO is an End User App for Individuals, Employees, Contractors and Volunteers to capture health test results with any TGA approved rapid test kit. This then creates a digital health record they can then share in real time to administrators / HR managers for site access / work clearance. The myNEO app integrates seamlessly into NEOVAULT so HR managers can take the appropriate actions.

NEOVAULT and myNEO are fully integrated that help you streamline your testing process. NEOVAULT is the first software platform for data driven testing that closes the loop between data, insight and action.

INDUSTRY PROBLEM

Dealing with legacy systems can be a headache for any organisation, most organisations do it manually with paper-based forms or excel sheets rather than use technology. It is tedious, repetitive and error prone, with end-users filling in manual forms to get one simple thing done. With this manual recording of data there is no ability for an organisation to analyse data in real time and take the required actions in a timely manner.

INDUSTRY SOLUTION

NEOVAULT provides a solution that solves this problem. NEOVAULT enables organisations to connect all their legacy systems in one place, which makes it easier for them to manage and analyse their data in real time and take appropriate actions quickly and efficiently.

NEOVAULT KEY FEATURES

- Test Management with flexibility regarding product types - with NEOVAULT you are able to use any rapid test kits that have been approved by the TGA.
- The NEOVAULT dashboard can be filtered and customised to instantly analyse a snapshot of the end users test, reports and active status.
- Inventory Management - NEOVAULT configures and tracks your inventory in real time. This helps ensure that test kits are utilised in a timely manner, minimising wastage from expired kits. It can upload unique batch numbers, serial numbers from manufacturer, QR codes if a higher level of chain of custody required. Alternatively standard kits as a simple result reporting tool.
- Back office - Role-based access control.
- Manage access privileges by assigning staff members to role-based permission groups.
- Push out notifications from NEOVAULT to end users to ensure tests are completed within the timing parameters set by the organisation.
- Privacy and Protection - Comply with major data protection laws and give end users peace of mind.
- Multi-language - NEOVAULT dashboard architecture is multilingual
